Experience

Fullstack Developer - SotaTek

May 2023 - Present

Hanoi, Vietnam

- Contributed to the design and development of diverse projects.
- Engineered core backend modules, including authentication, blockchain interaction, and high-volume data processing.
- Led the separation of a monolithic architecture into scalable microservices.
- Participated in the design and development of a video conferencing and live streaming application utilizing WebRTC and HLS technologies.
- Researched and engineered core functionalities for a web crawling application, including the implementation of anti-bot protection bypass techniques.

Software Engineer - Toshiba Software Development Vietnam

January 2022 - April 2023

Hanoi, Vietnam

- Developed and implemented a custom-authenticated HLS service for video streaming.
- Maintained and enhanced a Cloud-based File Management System (Media Service) by implementing new features.
- Participated in the research and development of a chatbot utilizing JavaScript and Elasticsearch.
- Established automated functional testing frameworks, including unit tests, to ensure code quality.

Intern Developer - 4Handy

August 2020 - March 2021

Hanoi, Vietnam

- Maintained and developed new functionalities for an internal JavaScript-based management system used for chain store operations.
- Engineered a bot to automate technical management workflows across Trello, Slack, and GitLab, improving efficiency.
